

Aim:

To store a list of first names and count the occurrences of 'a' within the list

Algorithm:

```
l=int(input("enter the num of first names"))
counts=0
for i in range(l):
    a=str(input("enter the name"))
    counts+=a.count('a');
print(counts)
```

Output:

```
C:\Users\acer\PycharmProjects\pythonProject\venv\Scripts\python.exe C:/Users/acer/PycharmProjects/pythonProject/occurence.py
enter the num of first names 3
enter the name John
enter the name Raj
enter the name John
4
Process finished with exit code 0
```
