

```
a=[1,2,3,8,4,10,22,6,5,7]
print(a)
for x in a:
    if(x%2!=0):
        print(x)
```

A screenshot of a terminal window with a dark background. The terminal shows the command to run a Python script and its output. The command is: `C:\Users\acer\PycharmProjects\pythonProject\venv\Scripts\python.exe C:/Users/acer/PycharmProjects/pythonProject/even.py`. The output is: `[1, 2, 3, 8, 4, 10, 22, 6, 5, 7]`, followed by the odd numbers `1`, `3`, `5`, and `7` on separate lines. At the bottom, it says `Process finished with exit code 0`. On the left side of the terminal, there is a vertical toolbar with icons for running, debugging, and other IDE functions.

```
C:\Users\acer\PycharmProjects\pythonProject\venv\Scripts\python.exe C:/Users/acer/PycharmProjects/pythonProject/even.py
[1, 2, 3, 8, 4, 10, 22, 6, 5, 7]
1
3
5
7
Process finished with exit code 0
```
