**Aim:**

Create a single string separated with space from two strings by swapping the character at position 1.

Algorithm:

```
str1=input("enter the str 1=")
str2=input("enter the 2nd str=")
print(str1.replace(str1[0],str2[0])+' '+ str2.replace(str2[0],str1[0]))
```

Output:

```
C:\Users\acer\PycharmProjects\pythonProject\venv\Scripts\python.exe C:/Users/acer/PycharmProjects/pythonProject/swapping.py
enter the str 1= hello
enter the 2nd str=yes
yhello  es

Process finished with exit code 0
```
